

## Introduction To Cascadia Home Products

Cascadia Home Products is a leading manufacturer of casual/ patio furniture, indoor home furniture and accessories for the home leisure and recreation market.

With Several years of experience in providing products to the world market place, Cascadia Home Products has established itself as both providing leading design innovation and also providing high quality/competitively priced products.

This catalogue is your reference material for our new line of multi-purpose outdoor recreational structures (gazebos) and also our line of modular pergolas. Combined with the broad line of casual/patio furniture, Cascadia is your one-stop shop for outdoor living products.

## Pergola Program Overview

Pergolas have been used for centuries to define and enhance outdoor living spaces. The pre-fabricated system is designed to provide an affordable pergola which can be tailored to your individual space equipments. Wall panel options provide privacy and wind protection. The Lattice roof panels increase shade, privacy and comfort. The unique system permits designing in 10'x10' increments. You can have a 10'x10', 10'x20', 10'x30', "L" shape, etc. easily fashioned to fit you particular space design needs.

## Tips Before Starting

8. Please follow all instructions in correct sequence.

## **Warranty Information On Cascadia Gazebo & Pergola Wood Products**

Cascadia Home Products Warranty our products to be free of material defects or manufacturing process errors to the end user/ consumer.

Cascadia warrants these products for private residential home use. Use of these products in a commercial or contract setting voids warranty.

Manufacturer agrees to repair or replace any parts of parts deemed defective by an authorized dealer, at manufacturer's choice of remedy.

### **Disclaimers:**

- A.** Damage as a direct or indirect result of floods, hurricanes, tornados and other violent abnormal weather extremes does not apply to warranty protection.
- B.** Please note that even with UV inhibitor finishes wood such as Cedar will experience slight sun-fade over time. Conditions vary by local climate and specific placement of your structure. Generally, stained cedar should be refurnished with a stain/sealer product every 2 – 3 years, similar to stained cedar siding on a house. Consult your paint / finish supply contractor or retailer for product recommendations.
- C.** In event of warranty inquiry, please contact the authorized retailer from whom the product was purchased.
